

The Five Deadly Sins of Empty Plastic Pesticide Container Management

These containers, even though triple rinsed, **MAY NOT BE**

- Buried on the farm
- Burned on the farm
- Re-used as containers
- Sold as containers for anything
- Given away as to be used as containers for any purposes

Die Vyf Dodelike Sondes van Leë Plastiek Plaagdoderhouerbestuur

Hierdie houters, al is hulle drie keer gespoel, **MAG NIE**

- Op die plaas begrawe word nie
- Op die plaas verbrand word nie
- Hergebruik word as houters nie
- As houters vir enige iets anders verkoop word nie
- As houters vir enige ander doeleindes weggegee word nie

**THEY MUST BE RECYCLED
HULLE MOET VERWERK WORD**

**IT IS THE RIGHT THING TO DO!
DIT IS DIE REGTE DING OM TE DOEN!!**

Waste Management Programme

Afvalbestuursprogram

Triple rinse your empty plastic pesticide containers

Spoel jou leë plastiek plaagdoderhouters drie keer uit

WHY TRIPLE RINSE EMPTY PESTICIDE CONTAINERS? WAAROM LEË PLAAGDODERHOUSERS DRIE KEER SPOEL?

Contaminated pesticide containers are classified as hazardous waste.

Gekontamineerde plaagdoderhousers word as gevaarlike afval beskou.

**TRIPLE RINSING IS A SOLUTION
TO PREVENT ACCUMULATION OF
HAZARDOUS WASTE.**

START NOW!

**DRIE KEER UITSPOEL IS 'N
OPLOSSING OM DIE OPBOU
VAN GEVAARLIKE AFVAL TE
VOORKOM.**

BEGIN NOU!

WHY?

To collect and use the total volume of pesticide that you paid for.

Om die totale volume plaagdoder waarvoor jy betaal het, te herwin en te gebruik.

To change the container from a hazardous to a non-hazardous commodity.

Om die houer van 'n gevaarlike na nie-gevaarlike kommoditeit te verander.

To make it suitable for transportation and recycling.

Om dit geskik vir vervoer en herwinning te maak.

WHEN?

After decanting the last bit of pesticide from the container into the spray tank.

Nadat die laaste bietjie plaagdoder in die spuitenk oorgegiet is.

HOW?

Add one quarter of the container volume of fresh water, agitate and decant into the spray tank.

DO THIS THREE TIMES!!

WAAROM?

99.9997% of pesticide is removed by triple rinsing

99.9997% van plaagdoder word met drie keer

spoel verwyder

Voeg een kwart van die houervolume vars water by die houer, skud en giet oor in die spuitenk.

DOEN DIT DRIE KEER!!

Dry the container out.

Droog die houer uit.

Cut into quarts or puncture.

Sny in kwarte of steek gate daarin.

THEN?

Contact a **CLSA** approved collector/recycler to dispose of the container.

Kontak 'n **CLSA** goedgekeurde versameelaar/verwerker om van die houer ontslae te raak.

DAN?
